MisterB Leather Indicator Jeans- with Piping

Description

The Mister B Indicator Jeans are one of the latest and most elaborate leather pants made.

Handcrafted from strong yet supple 100% aniline full grain cow leather. The main feature of these superb leather jeans are padded and stitched patches on the codpiece (which automatically draws the eye to the crotch), on the left and right front sides and on the ass saddle.

The Mister B Indicator Jeans are perfect for you when you want something out of the ordinary. Surely wearing them will guarantee a lot of attention in a bar or on a party.

Our Mister B Indicator Jeans have quite a low waist and a tight fit around the butt and the upper leg. Ideally, they ought to be a bit too tight when you get them because when you break them in, the leather stretches and becomes even more supple. Once broken in, a pair of Mister B leathers

will last you a very long time without becoming baggy, because the leathers we use are sturdy enough (1.3 - 1.4 mm).

This Indicator Jeans is all black and also do them with a red piping and red decorative stitching for an even wilder look. Since a good fitting is so important, we always advise to try them on in one of our stores or in one of our Shop-in-Shops. 100% aniline full grain cow leather 1.3 – 1.4 mm thick.

Low waist, tight fit. Length: very long. Finishing on length is a courtesy service in our stores. 2 front pockets and 2 back pockets, all zipped.

Double stitched belt loops, suitable for belts up to 5 cm / 2 inches wide.

With padded and stitched patches on the codpiece, legs and ass saddle.
