The seat by Moi

Description

The Seat

Take a seat or get comfy underneath! This beautiful piece of adult furniture is designed to give or get the ultimate rim job or (hole) eating experience. The actual seat part can be put up and down, like a real toilet seat. The PU-leather, used for finishing the seat and headrest parts, makes The Seat look kinky, yet easy to clean, if necessary.

With only 8.5 kg. this rim seat is light weighted but super strong. The height of the seat and headrest can be easily adjusted by using the pinch pins. The rubber hand grips on the sides offer extra help when trying to sit tight or just give that extra push downwards. At the same time these can also be used while underneath, to help stay in position or do pulls ups when trying to reach that extra depth with your tongue.

The adjustable backrest is covered with a foam layer for extra comfort when leaning backwards, but can also be used for easy grip to move the seat around and put it there where it's needed most. With the included mounting rod you can easily transform this rim seat into a fuck seat, by releasing the headrest, clicking on the mounting rod and attaching the compatible MOI Power Engine | Adjustable Fuck Machine
